Da Nang, Viet Nam

WEB FULL STACK DEVELOPER

With 3 year of experience in web development, I have hands-on skills in JavaScript, Java, Python, SQL, and Git. I have worked on real-world products spanning e-commerce platforms, AI-powered recruitment systems (LLM & RAG), and multi-country SaaS solutions. I am eager to keep learning and growing in full-stack and AI-integrated development.

TECHNICAL SKILLS

- **Programming languages:** JavaScript (TypeScript), Python, Java, SQL.
- **Frontend:** React.js, Next.js 14, HTML, CSS, Bootstrap, Material UI.
- **Backend:** Node.js, FastAPI, Django, Django REST Framework, Spring Boot, Wagtail CMS.
- **Database:** MySQL, PostgreSQL, Elasticsearch.
- **AI & Search:** LLM & RAG, PaddleOCR, semantic search with Elasticsearch.
- **Integration:** Stripe payment, RESTful APIs, Axios.
- **Container & CI/CD:** Docker, Docker Compose, CI/CD pipelines.
- **Source code tools:** Git, GitHub.

PROFESSIONAL EXPERIENCE

ShareCV — Remote

Feb 2026 – Present

Position:: Full-stack Developer

Project: AI-powered Recruitment Platform

Tech: Next.js 14, TypeScript, FastAPI, PostgreSQL, Elasticsearch, ChromaDB, LlamaIndex, Gemini, PaddleOCR, Docker

- Developed ShareCV end-to-end as a Full-stack Developer using Next.js 14 (TypeScript) for the frontend and FastAPI (Python 3.11) for the backend, with PostgreSQL, Elasticsearch, Docker, and role-based workflows for Recruiters, Collaborators, and Admins.
- Built core frontend features including job posting, multi-step CV upload, candidate search and filtering, interview scheduling, point packages, VNPay payment, and admin dashboards using Material UI, Ant Design, Redux Toolkit, React Hook Form, and Axios.
- Implemented backend REST APIs for authentication, job and CV management, search, payment, and administration; designed data models with SQLAlchemy, managed migrations using Alembic, and synchronized CV indexing with Elasticsearch through custom embedding ingestion pipelines.
- Built an LLM-powered CV/JD parsing pipeline combining PaddleOCR (GPU), PyMuPDF, and Google Gemini 2.5 Flash to extract structured information such as skills, experience, education, salary, and location, with multi-API-key fallback, parallel processing, and Regex-based JSON recovery.
- Developed an AI-powered candidate search workflow: frontend JD upload and auto-filter extraction, backend JD parsing via LLM, Elasticsearch hybrid search (keyword + vector embeddings), Cross-Encoder reranking for semantic JD–CV matching, and constraint-based scoring with dynamic threshold calibration.
- Designed and delivered a production-ready RAG chatbot using LlamaIndex, ChromaDB, BGE-M3 Vietnamese embeddings, semantic chunking, Gemini grounded generation with source citations,

retrieval and LLM caching, PostgreSQL chat history, and a real-time floating ChatBox widget.

- Optimized AI workloads for production with GPU OCR pools, lazy-loaded embedding models, in-memory retrieval and LLM caches, batch CV processing using atomic database locking, and Docker Compose deployment with PostgreSQL, Elasticsearch, Nginx, and frontend services.

maison21g.com — Remote

Apr 2025 – Jan 2026

Position: Full Stack Developer

Project: maison21g.com

- Built and maintained a multi-country e-commerce platform for bespoke perfume products using Django, Django REST Framework, and Wagtail CMS, serving markets including Singapore and the SEA region.
- Developed a product configuration management system supporting over 20 product categories (perfumes, candles, essential oil diffusers, etc.) with unique customization processes per category, including scent selection, bottle personalization, and gift wrapping.
- Developed end-to-end interactive survey funnels (including co-branded partnerships with Ferrari, McLaren, and BMW) and a complete seminar booking system with date selection, payment, and confirmation processes.
- Integrated Stripe payment for conference payment and booking modules, handling multiple payment methods across multi-currency and multi-country environments.
- Designed and implemented a promotional tool supporting percentage/fixed discounts, promo codes, shopping cart rules, and multi-currency pricing.
- Packaged the application using Docker and managed CI/CD pipelines for deployment.

EDUCATION

College of Phuong Dong — Da Nang

2023 – 2025

Information Technology | Major: Software Developer

CERTIFICATES

- Fullstack Developer(Node.js) — IViettech Center, Da Nang (2025)
